

AERIAL IMAGERY: AIRCRAFT vs. SATELLITE

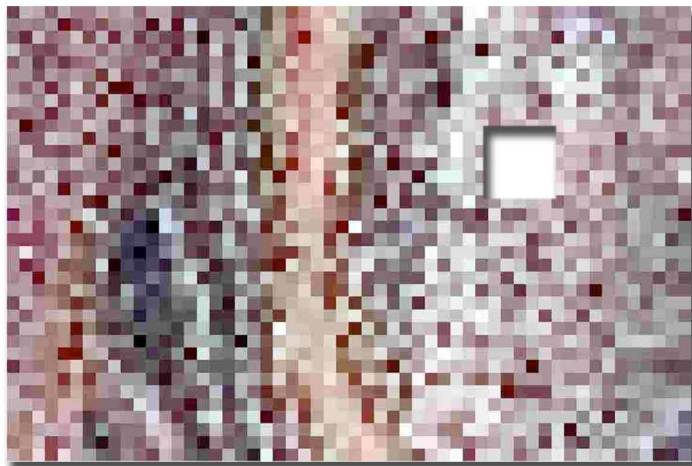

AgVision's data products, created from high-resolution aerial imagery, provide detailed, pixel-level intelligence for timely analysis.

**AgVision standard
product resolution:**

10 inch pixels (0.25 m)

**Study both images. In which close-up can
you see corn stalks blown over?**

Sample resolution:

200 inch pixels (5 m)

Why AgVision?

- Superior image processing (Colorized maps)
- Next-day delivery of data products
- Secure private infrastructure – No cloud storage
- High volume processing capacity
- Access portal for efficient data transfer
- Easily consumable products for farm management
- Expertise from data collection to farm integration
